Like the OPERON line of surgical tables, our accessories are characterized by robust construction, ergonomic functionality and a wide range of applications designed to meet the needs of nearly every surgical discipline. Our extensive portfolio range is designed for safe patient positioning and is arranged in this catalog by specialty and application to help ensure you have the best options possible, regardless of the imaging and positioning requirements.

Dimensions
Accessory dimensions are given in standard measurements. US standard operating room table side rails – 3/8” W x 1-1/8” H. All dimensions are L x W x H or L x W.

Weight Limitations
Accessories have weight limitations based on the patient’s total weight proportional to the body part being supported. When multiple accessories are used, the patient weight should be limited to the lowest capacity accessory. Known weight limitations are listed with the accessories throughout this catalog.
